

# Corner fireplace design wood or gas

Today, the corner fireplace is no longer just to heat the living room and dining room, at the forefront of design, it becomes a decorative object, without losing any of its usability.

Ideal in confined area, it can gain a real place.

The choice of the chimney is dictated by the dimensions of the room, the availability of the walls and the location of the chimney to vent the smoke.

You can choose between two types of Fireplaces: metal chimneys, which provide excellent resistance to high temperatures and are very easy to install, and a corner wood insert with a large fireplace to heat large homes .

The fireplace can be attached to the walls to provide a broader view of the fireplace to enjoy the spectacle of fire.

A wood or metal corner gas fireplace with modern contemporary design to install in a corner can be set or suspended with the advantages of a large fireplace. Homes that fit certain models of corner fireplace for inserting large logs of wood to heat large homes while enjoying a panoramic view of the fire and winning the most space. A modern corner fireplace open or closed fireplace easily find its place in your home.

Price fireplaces angle without tax

Have your chimney once a year by a chimney sweep for a safe use
